

Quantum model
hybrid VQC / QSVM

Matched classical
control
same front-end, capacity,
and regularisation sweep

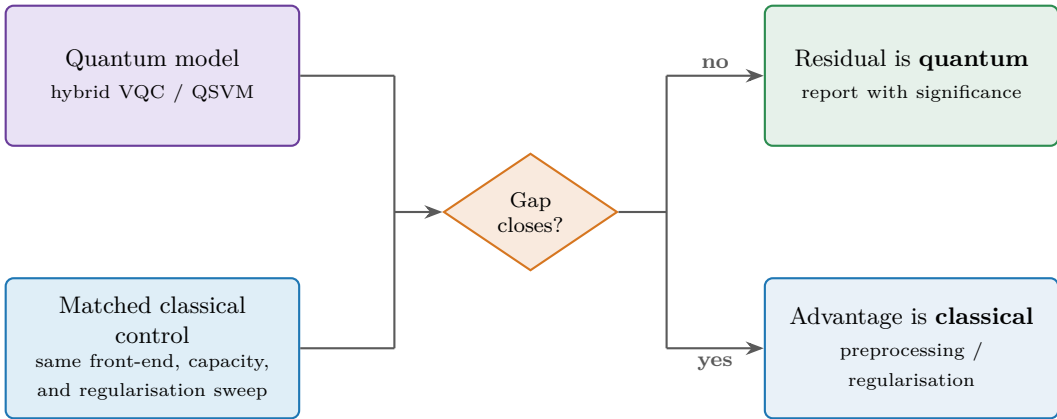

Gap
closes?

no

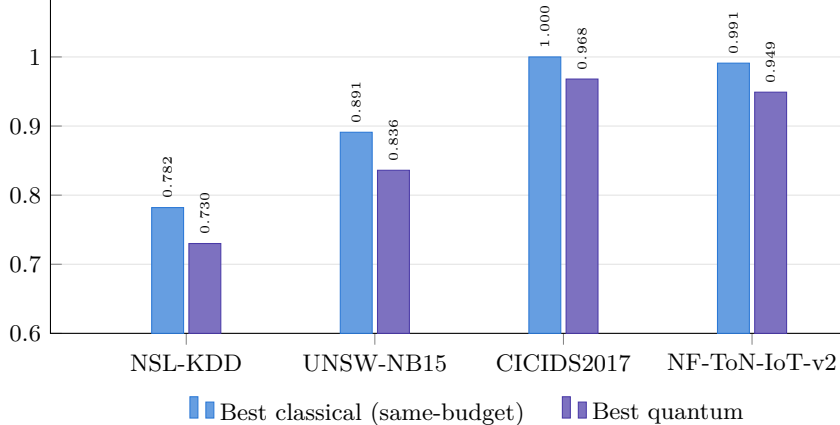

Residual is **quantum**
report with significance

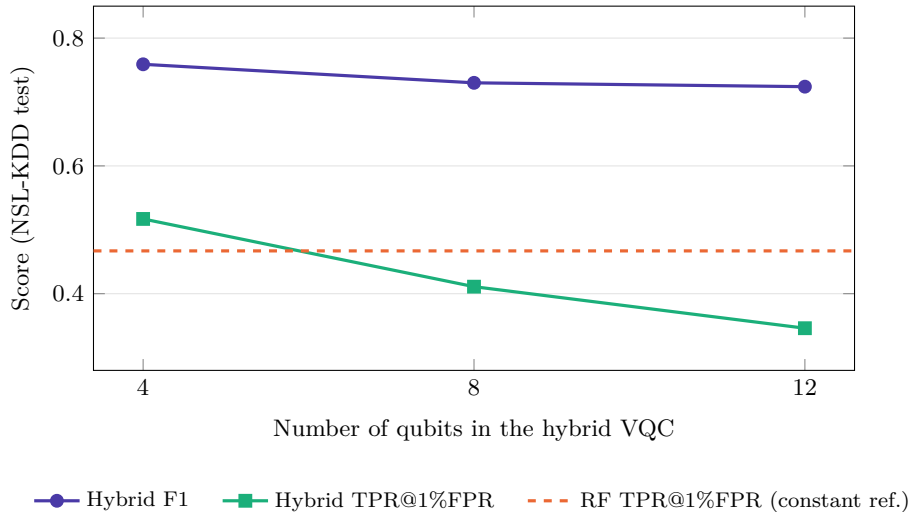

yes

Advantage is **classical**
preprocessing /
regularisation

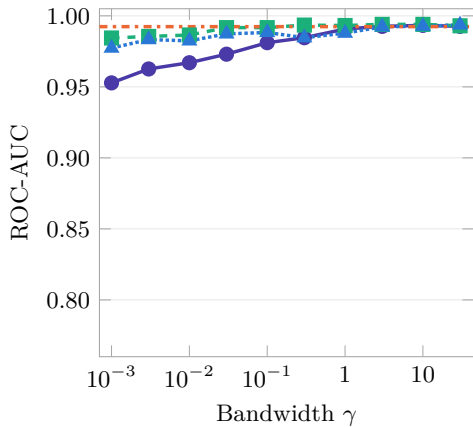

F1 (mean over seeds)

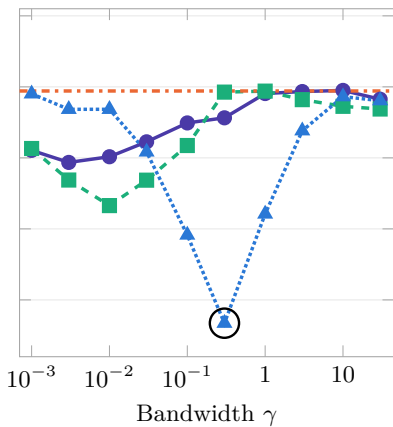

(a) In-distribution CV

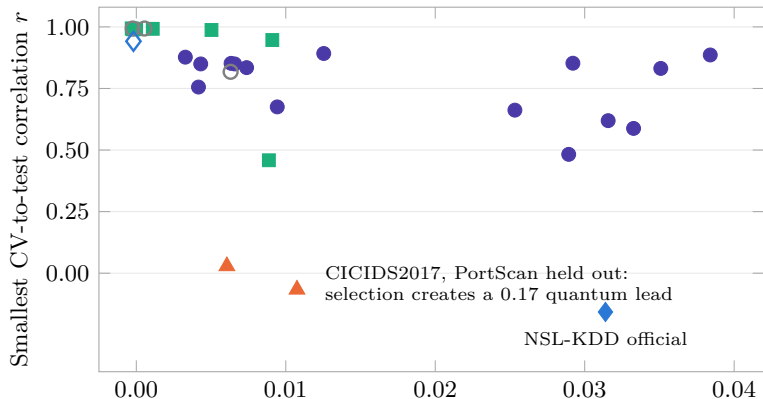

(b) Shifted test set

—●— Quantum IQP projected
- - -▲- - - Classical RBF (raw features)

- -■- - Classical phase kernel
- - - Quantum IQP fidelity

Label-free shift: squared MMD, training sample vs. unlabelled test sample

- UNSW-NB15 holdout
- ToN-IoT holdout
- ▲ CICIDS2017 holdout
- No holdout
